

LSZH Cable Assemblies

L-com manufactures and stocks Low Smoke Zero Halogen (LSZH) cable assemblies for use in confined space environments. Typical applications for LSZH cables include use in aerospace environments, especially sealed aircraft, use in submarines, tanks and other military vehicles as well as any confined space network. LSZH is used to protect valuable communications equipment from corrosive gasses and human lives from toxic smoke in the event of a fire. In addition to thousands of off-the-shelf LSZH cable assemblies, L-com can custom manufacture LSZH cables to your specifications.

Ethernet LSZH Cable Assemblies

- Straight and Right Angle Boots
- Shielded and Unshielded Options
- Cat5e and Cat6 Versions Available

D-Subminiature LSZH Cable Assemblies

- Male to Male and Male to Female Options
